Very helpful ! I studied for my operator certification exam using this book and the DVD entitled "Wastewater Math" to pass my exam. Both were helpful. Here's the link for the DVD: Wastewater Math: Video Course for Operator Certification .

The book is a great read. One of the authors Frank Spellman has written many books regarding environmental and water sciences. It is easier to follow than other books of a similar topic, so it is especially useful to individuals who are unfamiliar with wastewater plant operations. I work for a water utility, but in the drinking water and distribution section. I feel that this book has helped to add wastewater to my knowledge and I now feel confident enough to consider taking the EPA wastewater certification exam.

Excellent resource.

Great!
